MODERN GASWORKS CHEMISTRY (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Modern Gasworks Chemistry In recent years it has come to be recognised that the Gas Industry is essentially a chemical industry. For this reason the chemist is rapidly being incorporated as an essential part of the controlling organisation. It is of national importance that coal - our greatest national asset - should be treated at all times with due regard to the fact that the supply is by no means unlimited. While coal is chiefly valued from the thermal standpoint it has to be remembered that it is also the only raw material from which many important substances can be obtained on a commercial scale. The Gas Industry is responsible for the primary treatment of a very large quantity of coal each year, and besides supplying the public with heat, light, and power it stands as an intermediary between the colliery and the chemical trade. Every year it becomes more and more important that there should be a definite collaboration between modern research and commercial practice. Time is always a factor to be considered, and to permit research work to lie neglected for many years, buried in a mass of literature with its significance unappreciated, is a sign of gross national inefficiency. It is for the chemical organisation to ensure that the application of research work to practical conditions follows quickly upon the advance of knowledge. This volume has not been written with the intention of discussing the chemical and physical theories which form the basis of the various processes carried out and the relative merits of various types of plant. Rather is it intended to describe the methods of controlling plant and processes in...
