There should be a strengthening rib upon the outside of the clips to prevent them from bending or breaking when the specimens are very strong. The clips should be hung on pivots so as to avoid as much as possible cross strain upon the briquettes. MACHINES. No special machine has been recommended, as those in common use are of good form for accurate work, if properly used, though in some cases they are needlessly strong and expensive. Machines with spring balances are to be avoided as more liable to error than others. It is by no means certain that there exists any great difference in well made machines of the standard forms given. AMOUNT OF MATERIAL. The amount of material needed for making five briquettes of the standard size...
