Dreamtech Press. Paperback. Book Condition: New. VBA Programming is the book you must delve into get complete advantage of the Microsoft Office 2007 suite by automating Office tasks, such as typing and formatting text or creating a custom presentation using VBA macros. You might have performed these routine tasks multiple times. Being precise and complete, this book shows you how to perform these repetitive tasks by just a single click of the mouse. It uses a step-by-step instructional approach while explaining the examples. It introduces you to VBA programming fundamental concepts, such as arrays, collections, classes, and objects. It also shows you how to handle events and errors in a program. In addition, it shows you how to use modules, procedures, and functions in your application. It discusses the working of different object models, such as Word, Excel, and PowerPoint. It enables you to create user-defined menus, toolbars, and dialog boxes. Further, the book also discusses how to create templates and add-ins for Office applications and implement security in Office applications. You will also find several programs, questions, and exercises in this book.
